

Appl. No. 10/689,012

UTILITY PATENT

Amendment in Resp. to Office Action of Oct 17, 2005

B&amp;D No. TN-3167A

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claims 1-30 (canceled).

Claim 31 (currently amended): A level disposable on a substantially vertical reference surface comprising:

a housing;

a first light diode disposed in the housing for emitting a first light beam along a first path;

a first lens disposed in the housing in the first path ~~for converting~~ to adapt the first light beam into a first planar beam, the first planar beam forming a first line on the vertical reference surface;

a detector circuit disposed in the housing for detecting a feature behind or underneath the vertical reference surface;

a hanging assembly connected to the housing ~~for mounting~~ to mount the level to the vertical reference surface, the hanging assembly comprising a reference surface assembly that contacts the vertical reference surface; and

a magnet disposed on one of the reference surface assembly and the housing, and a metal plate disposed on the other of the reference surface assembly and the housing, wherein said hanging assembly is connected to said housing via said metal plate and said magnet.

Claim 32 (currently amended): The level of Claim 31, further comprising a second light diode disposed in the housing ~~for emitting~~ to emit a second light beam along a second path, and a second lens disposed in the housing in the second path ~~for converting~~ to convert the second laser beam into a second planar beam, the second planar beam forming a second line on the reference surface, wherein said first and second planar beams do not intersect.

UTILITY PATENT

Amendment in Resp. to Office Action of Oct 17, 2005  
B&D No. TN-3167A

Claim 33 (previously presented): The level of Claim 32, wherein the first and second lines are substantially perpendicular.

Claim 34 (previously presented): The level of Claim 32, wherein the first and second lines are substantially parallel.

Claim 35 (canceled).

Claim 36 (currently amended): The level of Claim 31 ~~35~~, wherein the detector circuit detects at least one of the group consisting of studs, wire and pipes.

Claim 37 (currently amended): The level of Claim 31 ~~35~~, wherein the detector circuit controls the first light diode so that, upon detecting the feature, the first light diode lights up.

Claim 38 (currently amended): The level of Claim 31 ~~35~~, wherein the detector circuit does not control the first light diode.

Claim 39 (currently amended): The level of Claim 31, wherein the first line is substantially horizontal ~~and the reference surface is a substantially vertical wall.~~

Claims 40-41 (canceled).
